Check Valve Replacement Kit

Installation Instructions

Current production ice machines no longer have a drain line check valve. The drain line check valve assembly and components are no longer available.

Use this kit to replace the check valve assembly.

1. Remove the entire check valve assembly.
   a) Remove the check valve.
   b) Remove the tee.
   c) Remove the existing tubing to the drain adapter.
2. Slide insulation over provided vinyl tubing.
3. Connect the tubing from the dump valve directly to the drain adapter.
4. Remove the existing condensate drain pan.
5. Install condensate drain pan provided with kit.
