K00391 Ice Deflector

Installation Instructions

1. Locate correct position for the deflector.
2. Remove existing screws from front and back rails of ice machine.
3. Position the bracket so that the retaining pin is located in the back.
4. Mount deflector bracket by installing screws in the front and back ice machine rails.
5. Install deflector into mounting bracket.
   - Align tabs and slide deflector toward the front of the bin.
   - Insert retaining pin into hole in mounting bracket to lock deflector in place.
