Installation Instructions for SN-RNS Bin Kit

WARNING

Disconnect main electric power to the ice machine before proceeding.

1. Remove all ice from the bin, then remove top and side panels.

2. Remove chute cover.

3. Unscrew wiper.

4. Loosen clamp around the neck of the evaporator.

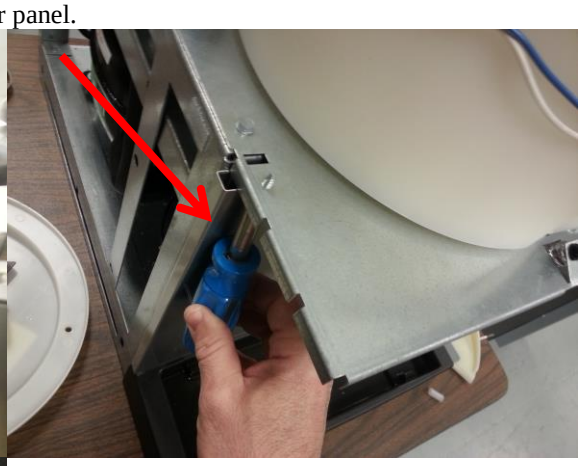

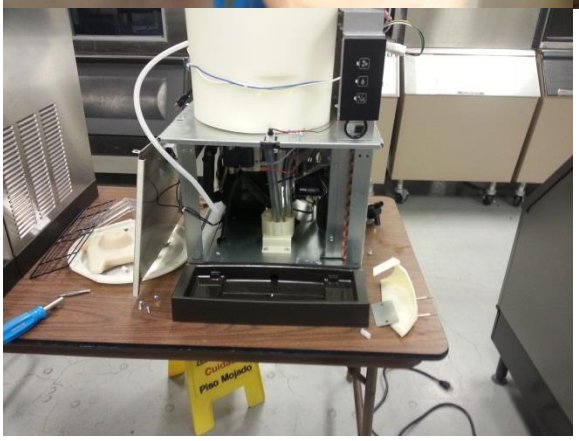

5. Remove ice chute assembly.
6. Remove bin cover.

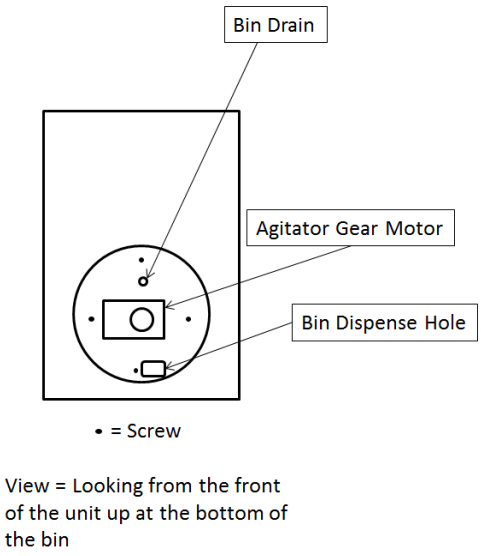

7. Remove agitator bar, ice deflector, dispense wheel and drive pin.

8. Remove front ice dispense chute, then the front lower panel.

9. Locate the four screws that hold the bin in and remove them.

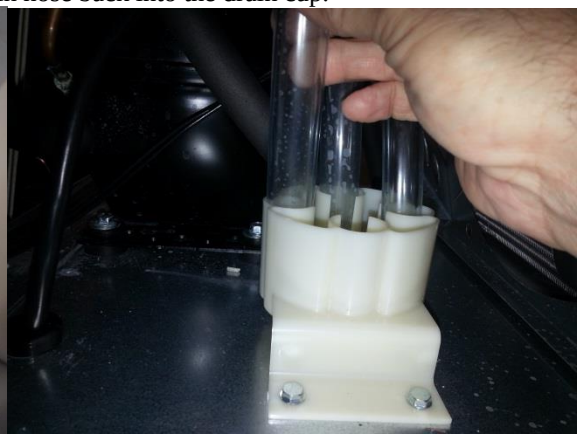

10. Remove drain from old bin and install it in the new bin.

11. Place the new bin in place and then place the bin drain hose back into the drain cup.

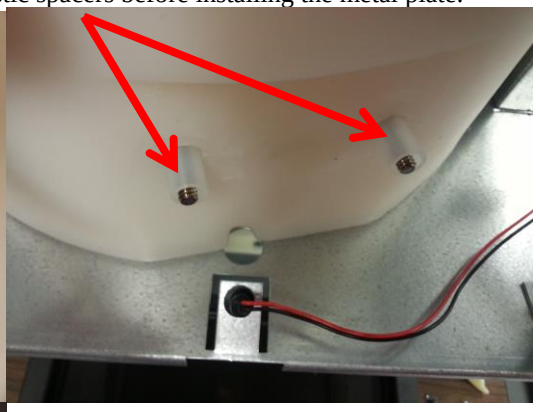

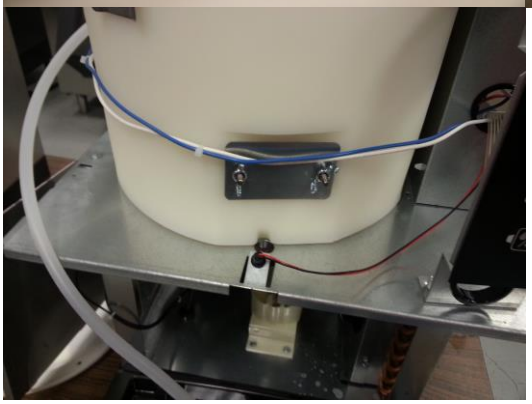

12. Re-install the four bin screws.
13. Re-install the drive pin and dispense wheel, push down the dispense wheel until snug.

14. Re-install ice deflector, be sure to install the plastic spacers before installing the metal plate.

15. Re-install the agitator bar and then screw in the three branch agitator.

16. Replace components removed in steps 1 through 6.
