Instruction Sheet

Subject: K00458 Bin Adapter

BIN ADAPTER 30" ICE MACHINE ON 48" BIN

⚠Warning

Authorized Service Representatives are obligated to follow industry standard safety procedures, including, but not limited to, local/national regulations for disconnection / lock out / tag out procedures for all utilities including electric, gas, water and steam.

The K00458 kit is used for installing 30" ice machines on a Manitowoc "B970 or K970" bin.

1. Remove protective coating from support rail and bin adapter prior to assembly.
2. Refer to drawing and place support in position. Angled flange of support must face the front of the bin. Apply foam tape on the top of the support.
3. Place bin adapter on bin - No fasteners are required.
4. Apply foam tape from the kit around bin top opening.
   A. Foam tape applied to the front of the opening must be located under the ice machine bottom rail. Center foam tape at 22 1/2 inches from rear of bin top. Edge of foam tape will be approximately 1 1/4" in front of the bin top opening.
   B. Apply foam tape around the sides and rear of the bin top opening.
5. Place bin in final position and adjust legs to level bin in all directions.
6. Refer to Ice Machine Installation Manual for ice machine installation. Cleaning/sanitize the ice machine and bin when installation is complete.
