Instruction Sheet

Subject: 30 Inch Indigo Ice Machine Baffle

Installation Instructions

⚠Warning

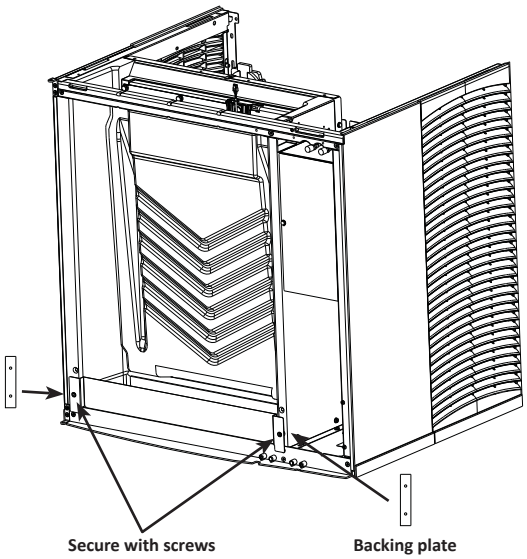

Authorized Service Representatives are obligated to follow industry standard safety procedures, including, but not limited to, local/national regulations for disconnection / lock out / tag out procedures for all utilities including electric, gas, water and steam.

DANGER

Disconnect electric power to the ice machine at the electric switch box before proceeding. Failure to disconnect the power at the main power supply disconnect could result in serious injury or death. The power switch DOES NOT disconnect all incoming power.

⚠Warning

This equipment contains refrigerant charge. Procedures must be performed by a properly trained and certified refrigeration technician aware of the dangers of dealing with refrigerant charged equipment.

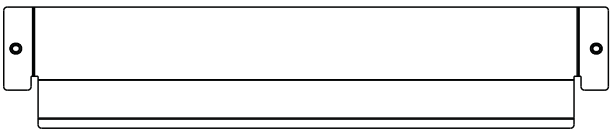

Install Backing Plates, Baffle and Screws

Installation

1. Remove front, top and left panels.
2. Examine the ice machine to determine if the ice machine has four screws installed in the mounting location for the baffle (refer to drawing).

- Screws are present - Remove and discard bottom screws on both sides of ice machine.
- Screws are not present - Pierce the thin plastic covering on the bottom countersunk mounting holes on each side of the ice machine.

3. Install backing plates on both sides of the machine (not required for models with screws installed in step 2).
4. Install the baffle using the screws from the kit.
5. Replace all panels.

Baffle
