Manitowoc mixing instructions for Powdered Descaler and Chlorine Rinse

1) Open the package.
2) Pour powder into a 34 oz (1 Liter) mixing vessel.
3) Fill vessel with 34 oz (1 Liter) of luke warm tap water.
4) Tighten the cap on vessel and shake for 30 seconds or until fully dissolved.
5) For when to add chemicals: follow the on screen instructions for Indigo NXT or printed cleaning instructions for your ice machine. Pour entire amount of dissolved chemical into the water trough. FOLLOW THE TABLES BELOW FOR THE PROPER AMOUNTS OF DESCALER AND CHLORINE RINSE:

PRECAUTIONS:

DO NOT MIX MORE THAN 2 PACKETS OF DESCALER PER 34 oz (1 Liter) OF WARM WATER. CONTENTS WILL NOT DISSOLVE PROPERLY.

DO NOT POUR PACKAGE DIRECTLY INTO THE ICE MACHINE TROUGH. POWDER MUST BE DISSOLVED IN 34 OZ (1 Liter) OF WATER FIRST.

POUR THE ENTIRE 34 oz (1 Liter) VESSEL OF THE DISSOLVED POWDER INTO THE WATER TROUGH NOT JUST A PORTION.

NEVER MIX DESCALER AND CHLORINE RINSE PACKETS TOGETHER.

IF UNFAMILAR WITH THE CLEANING PROCEDURE , CONSULT YOUR USER MANUAL OR THE INSIDE DOOR PANEL.

Recommended packets of **Descaler** per Ice Cuber machine

Model # Modelo # Modele#	250-462, 520,620, 696,820,894	500, 600, 606, 662, 686,700,750,850, 900-1200	1300-2170	3000-3300
Packets	1	2	3	4

For soaking and spraying individual parts, mix and dissolve 4 packets of descaler into 1 gallon (3.7 L) of luke warm water.

Do not mix more than two packets of descaler per 34 oz (1 liter) of warm water.

Recommended packets of **Chlorine Rinse** per Ice Cuber machine

Model # Modelo # Modele#	250-462, 520,620, 696,820,894	500, 600, 606, 662, 686,700,750,850, 900-1200	1300-2170	3000-3300
Packets	1	2	3	5

For soaking and spraying individual parts, mix and dissolved 3 packets of Rinse into 3 gallons (11.4L) of luke warm water.
