Instruction Sheet

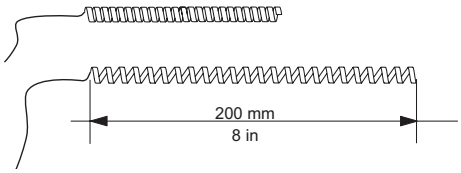

Subject: Bin Thermostat Replacement

PART NUMBER 000016461

Step 1 Taking care to avoid kinks or breaks, reference the existing thermostat capillary tube and unroll the replacement thermostat capillary tube to match.

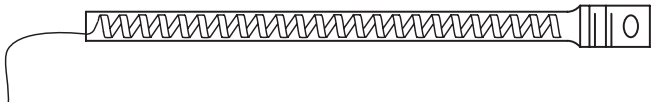

Step 2 Expand the capillary tube spiral to obtain a length of 200 mm (8”).

Step 3 Install the thermostat, taking care to avoid damaging the capillary tube.

NOTE: When the thermostat capillary tube is to be inserted into a bulb-holder, verify the capillary tube has 360 degree contact with the bulb-holder walls.

Step 4 Turn the thermostat adjustment fully clockwise and then adjust the thermostat for your model and test for proper operation.

Model	Setting
RNS0608A RNS0609W RNF0620	2
RFF0320 RNS0600 RFF0620 RFK0620 RNK0620 RNS1000 RNF1020 RNF1100 RNK1100 RFF1220 RNF2000 RFF2200 RFK2300 RFF2500 All Other Models Not Listed In This Chart	3
RF0300 RFS0300 RNS0300 RFK0320 RF0650 RFS0650 RFK1300	4
RF1200 RFS1200 RFF1300 RF2300	5

NOTE: The thermostat can be adjusted for more or less ice in the bin. Use the initial setting from the chart and adjust as required. Proceed with small adjustments (of about 10°) and check result, before carrying out further adjustments.

- Clockwise = More ice in the bin
- Counterclockwise = Less ice in the bin
