Instruction Sheet

Subject: Evaporator Thermostat Replacement

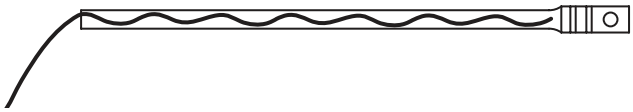

PART NUMBER 000016463

Step 1 Taking care to avoid kinks or breaks, reference the existing thermostat capillary tube and unroll the replacement thermostat capillary tube to match. .

Step 2 Install the thermostat, taking care to avoid damaging the capillary tube.

NOTE: When the thermostat capillary tube is to be inserted into a bulb-holder, shape it for 6 inches (15 cm) to increase contact with the bulb-holder walls before inserting.

Step 3 Turn the thermostat adjustment fully clockwise and then adjust the thermostat for your model and test for proper operation.

Model	Setting
UFF0200 UFK0200 RF0244 RNS0244 RF0266	5
UNK0200 UNK0300	6
RF0300 RFF0320 RFK0320 UFF0350 UFK0350 RF0385 RNS0385 RF0388 RF0399	7

NOTE: The thermostat can be adjusted for a large dimple and a lighter cube or a small dimple and a heavier cube. Use the initial setting from the chart and adjust as required. Proceed with small adjustments (of about 10°) and check result, before carrying out further adjustments.

- Clockwise = Small dimple and heavier cubes
- Counterclockwise = Larger dimple and a lighter cube
