Instruction Sheet

Subject: K00512 Bin sleeve

LBCS1360 BINS

⚠Warning

Remove all removable panels before lifting and installing an ice machine and use appropriate safety equipment during installation and servicing. Two or more people are required to lift or move to prevent tipping and/or injury.

To avoid instability the installation area must be capable of supporting the combined weight of the equipment and product. Additionally the equipment must be level side to side and front to back..

DANGER

If an ice machine was previously installed:

- Turn off and lockout power and water supplies. Failure to disconnect power at the main power supply disconnect could result in serious injury or death. The power button DOES NOT disconnect all incoming power.
- Remove all removable panels from the ice machine.
- Use appropriate safety equipment and two or more people to remove the ice machine from the bin.

1. Place LBCS1360 bin in position and level front to back and side to side.
2. Ensure gasket is in place on top of the bin before placing the sleeve on the bin. Place the sleeve on the bin so that the brushed stainless steel is facing towards the front of the bin.
3. Refer to warning above and then place the ice machine on the sleeve.

NOTE: Additional sealants are not required under or above the bin sleeve.

4. Follow ice machine installation instructions to complete installation of ice machine.
