ISO 9001 Quality System Certified

COMPRESSOR AND ELECTRICAL COMPONENT REPLACEMENT INSTRUCTIONS COMPRESSOR ASSEMBLY 7620363

The compressor and electrical components are directly interchangeable on the E0600 series ice machines.

On the ME500, MC500, A0600, and C0600 series ice machines, you will also need kit, 0700503, to replace a compressor with a suction rotolock valve.

NOTE: When replacing a compressor, always replace the electrical components with the new ones supplied in this assembly.

1. Unsolder tubes and disconnect wiring to remove old compressor.

2. Discard the old electrical components and mount the new components supplied in this assembly (see sketch below for rewiring). Mount the new compressor in place, solder tube connections, and rewire the compressor electrical components (see sketch below).

3. Replace drier. Check your Manitowoc parts manual for correct drier size.

COMPRESSOR ASSEMBLY CONSISTS OF:

(1)Compressor.....8401213
(1) Start Relay.....8504363
(1) Start Capacitor.....8503643
(1) Run Capacitor.....8503413
(1) Instruction Sheet.....8001313
