ACCESS VALVE REPLACEMENT FOR 22", 30", AND 48" ICE MACHINES

Installation Instructions

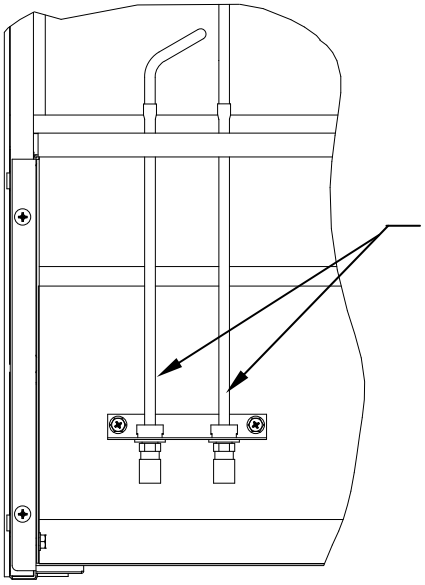

Process valve, Manitowoc part number, 8373103, is no longer available from the manufacturer. Substitute access valve, Manitowoc part number, 8373263, supplied in this package

Installation instructions for Manitowoc 22" ice machines:

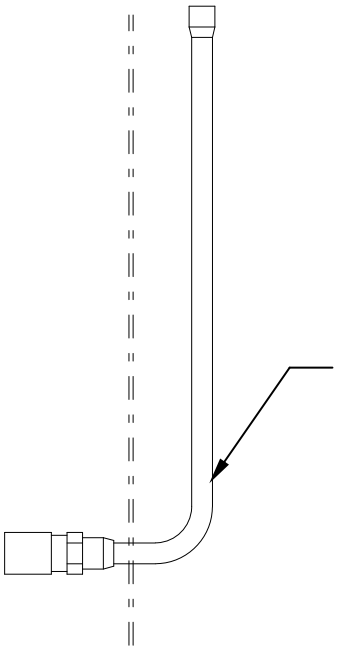

1. Remove refrigerant from ice machine or use pinch-off tool to isolate the valves from the refrigeration system.
2. Cut the 1/4" diameter tubing.
3. Remove process valve.
4. Install access valve.

Installation instructions for Manitowoc 30" and 48" ice machines:

1. Field bend 90° new access valve. Valve may protrude through bulkhead more than existing valve.
2. Cut existing tubing to proper length.
3. Remove existing valve.
4. Install bushing in bulkhead hole.
5. Braze in replacement valve.

Access valve shown installed in 22" ice machines

Access valve shown installed in 30" and 48" ice machines
