K00199 WATER INLET KIT UK (QM-30)

Installation Instructions

1. Disconnect power to ice machine.
2. Turn off water supply to ice machine and remove water line from water inlet valve.
3. Remove rear panel.
4. Unplug wire leads from the water inlet valve coil, remove 5/16” screws fastening valve, and remove valve (discard screws).
5. Using #10 screws, install water inlet valve/valve bracket.
6. Remove black compression nut from 1/4” tube and insert tube into the plastic fitting located at the outlet of the water inlet valve.
7. Connect coil wiring and secure ground wire to frame with ground screw provided.
8. Reinstall panels.
9. Apply agency approval label to the back of the machine near the serial plate.
10. Connect water supply line to new water inlet valve and turn on water.
11. Reconnect power to the ice machine.
