K00201 (IB-SERIES) WATER INLET KIT UK

Installation Instructions

1. Disconnect power to ice machine.
2. Turn off water supply to ice machine and remove water line from water inlet valve.
3. Remove front cover, top panel, and left side panel.
4. Unplug wire leads from water inlet valve coil and remove clear tubing and insulation connected to the water inlet valve and water inlet/AuCS fitting (discard tube).
5. Remove two 5/16” screws fastening water inlet valve and remove valve (discard screws).
6. Using bracket screws, 5202323, install water inlet valve/valve bracket. Reconnect water supply to valve.
7. Cut new water inlet/AuCS tube, 4003723 (if necessary), to match the clear tube removed, insulate new tube with existing insulation, and install tube to water inlet valve and water inlet/AuCS fitting.
8. Install wire leads to water inlet valve coil, install ground wire, 2001033, from coil to terminal block.
9. Install side, top, and front cover.
10. Apply agency approval label to the back of the machine near the serial plate.
