COMPRESSOR REPLACEMENT

Installation Instructions

Note: The replacement compressor may be different than the original and/or have slightly different tubing configurations. The suction line, discharge line, and suction service line at the compressor may need to be rerouted, when making this change-out.

REPLACEMENT START RELAY

1. Using new thread cutting screws, attach relay to new mounting bracket.
2. Use existing screws (used to mount old relay) to attach new relay mounting bracket to electrical box.
3. **IMPORTANT:** New relay is turned 180° and terminal numbers have changed location. Be sure wire leads are attached to proper terminals, as marked on relay.
