Instruction Sheet

Subject: K00347 Ice Deflector Kit

INSTALLATION INSTRUCTIONS

⚠Warning

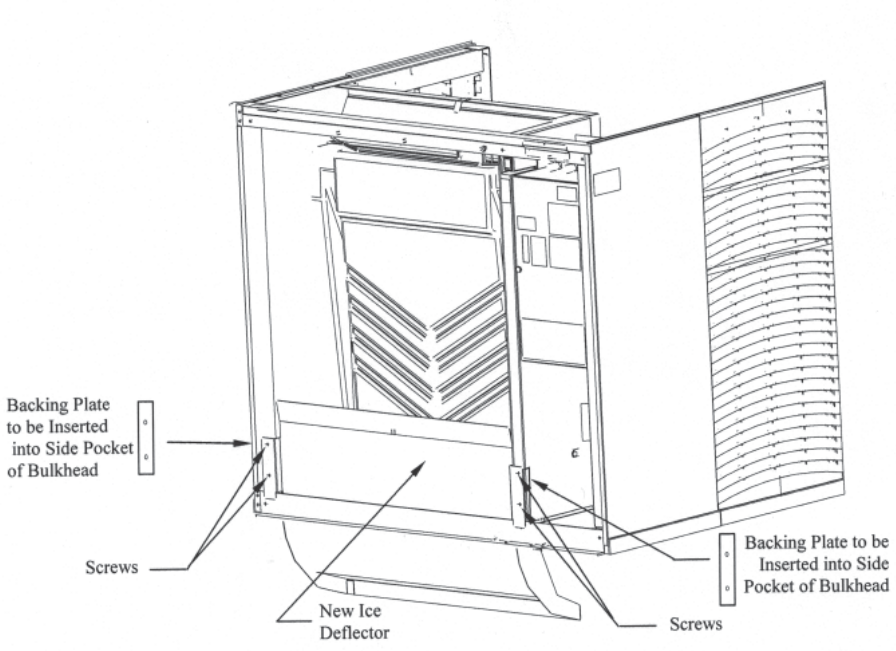

Authorized Service Representatives are obligated to follow industry standard safety procedures, including, but not limited to, local/national regulations for disconnection / lock out / tag out procedures for all utilities including electric, gas, water and steam.

⚠DANGER

Disconnect electric power to the ice machine at the electric switch box before proceeding. Failure to disconnect the power at the main power supply disconnect could result in serious injury or death. The power switch DOES NOT disconnect all incoming power.

The K00348 ice deflector kit must be used with Indigo, Koolaire or S model 30" wide ice machines installed on a non Manitowoc ice storage bin.

1. Remove front, top and left panels.
2. Examine the ice machine to determine if the ice machine has four screws installed in the mounting location for the ice deflector (Refer to drawing).
    - Screws are present - Remove and discard.
    - Screws are not present - Pierce the thin plastic over the countersunk mounting holes.
3. Install backing plates on both sides of the machine (not required for models with screws present in step 2).
    - Indigo models - Remove the touch pad to allow backing plate access on the right side.
4. Install the ice deflector using the screws from the kit.
    - Indigo models - Reinstall the touch pad.
5. Replace front, top and left panels.
