Installation Instructions

Subject: K00525 – Front Panel Thread Replacement

COMPONENTS

PARTS INCLUDED IN KIT

BRACKET - QTY 2

TOOLS REQUIRED

PHILLIPS HEAD
SCREWDRIVER

PROCEDURE

	1. Remove and dispose of the two Phillips head front panel screws using the Phillips head screwdriver. Lift up to remove front panel.
	2. Remove the two Phillips screws holding the left corner post to the base using the Phillips head screwdriver. Retain screws for reuse. CAUTION - Only remove screws from one side of ice machine at a time.
	3. Orientate the bracket (as shown) with the riv-nut inserted into the bottom hole.
	4. Re-install two screws to secure the bracket. 5. Repeat process for the right corner post.
	6. Refer to K00518 Tamper Resistant Screw Kit instructions to install kit and secure front panel.
