Instruction Sheet

Subject: Replacement Control Board

UNDERCOUNTER UNITS: U/UF/UP & KP

⚠Warning

Authorized Service Representatives are obligated to follow industry standard safety procedures, including, but not limited to, local/national regulations for disconnection / lock out / tag out procedures for all utilities including electric, gas, water and steam.

DANGER

Disconnect electric power to the ice machine and condensing unit at the electric switch box before proceeding. Failure to disconnect the power at the main power supply disconnect could result in serious injury or death. The power switch DOES NOT disconnect all incoming power.

⚠Warning

This equipment contains refrigerant charge. Procedures must be performed by a properly trained and certified refrigeration technician aware of the dangers of dealing with refrigerant charged equipment.

1. Disconnect electric power at the main power disconnect.
2. Remove panels required to access the control board.
3. Note locations and disconnect wiring from control board and remove control board.
4. Snap replacement control board onto mounting pins and reinstall wiring.
5. Reinstall removed panels.
6. Reconnect power and test run the ice machine to verify correct operation
