Subject: Dual Evaporator Ice Machine Splash Shield

A splash shield is available for S and Indigo model dual evaporator ice machines (P/N 000009118). Some ice machines have experienced water splash on the front door and this shield directs water splash back into the water trough. Indigo dual evaporator models starting with serial number 1101087043 include the splash shield.

The splash shield rests in the water trough, is removable without tools and does not require fasteners.

Place lip of shield in water trough to install

Shield rests in water trough and does not require fasteners to secure
