Subject: Bristol Compressor Replacement

BRISTOL COMPRESSOR SERVICE REPLACEMENT GUIDE

Due to Bristol compressors no longer being manufactured Manitowoc Ice has created kits to make replacement compressors straightforward. Manitowoc Ice has certain Bristol Compressors in stock to cover replacements. However specific models have Copeland or Embraco compressors as a replacement.

As the tubing needs to be re-configured when switching from a Bristol to a Copeland or Embraco compressor, we have designed tubing kits to make this task simple. If you are replacing a Bristol compressor with a Bristol compressor, there is no need for the tubing kit. If you are replacing a Bristol Compressor to a Copeland compressor, a tubing kit is required.

To summarize:

Failed Compressor	Replacement Compressor	Tubing Kit Required
Bristol	Copeland / Embraco	Yes
Bristol	Bristol	No
Copeland	Copeland	No
Embraco	Embraco	No
Samsung	Samsung	No

If a tubing conversion kit is required, see below Matrix:

Model Numbers	Tubing Conversion Kit Part Number
i0600, i0606, iF0600, iF0900 S0600, Q0600, i0906, iCVD0695, iCVD0696, CVD0695, iCVD0696, CVD0685, CVDF0600, iCVD0996, CVDF0900	000015723
