Electronic Control Boards

S MODEL FLAKE/NUGGET CONTROL BOARDS

Control Board Lights

#1 Nugget - Red, indicate the control is configured for nugget ice machines.

#2 Flaker - Red, indicates the control is configured for flaked ice machines.

#3 HES #1 - Green, works in conjunction with the Hall Effect Switch #1. When the ice damper is closed the light is on.

#4 HES #2 - Green, works in conjunction with the Hall Effect Switch #2. When the ice damper is closed the light is on.

#5 Clean - Yellow, indicates the unit is in a clean sequence.

#6 Maint. - Red, indicates that maintenance is required. Only used when configured for nugget.

#7 Water - Energizes when the water level in the reservoir closes (raises) the float switch. De-energizes when the float switch opens.

Racing Lights - All lights racing indicates a 5-minute delay period is timing out.
